

## Update to returns in Adult Literacy

### For new Learners & updates.

When you add a learner and on the learner profile screen if you select either “ESOL at Work” or “ESOL Other” you will get a warning to say that these values are no longer included in the department returns and you will be prompted to select another value.

### To resolve for Existing Learners

Users should go to the Report Generator and select either “ESOL at Work” or “ESOL Other” in the Economic Status and click Preview learners. They can then update the learners to one of the correct Economic Statuses for the Department returns.

### In the Returns

When a user selects ESOL Returns in the dropdown list they will see a warning reminding them that “ESOL at Work” or “ESOL Other” are no longer valid entries in the Economic Status field for Department Returns and prompting them to resolve any incorrect status selections.

We will update the table numbering to match the department returns.
